	Date	Verifier Initials
Review UC Davis Health Policy 340 Phototherapy		
Review Phototherapy Basics Handout available in Dermatology Clinic		
Read manuals on PUVA treatments, patient assessments, and equipment (provided by Dermatology Clinic)		
State which diseases the UVA machine treats		
Educates new patients starting phototherapy (explain treatments and instructions, answers patient questions, provides instructional and informational handouts to patients)		
Reviews medication history with patient prior to treatment, noting any photosensitizing medications		
Readies and disinfects patient area prior to treatment		
Demonstrates how to warm the UVA machine by turning it on and accurately demonstrates how to input the calibration results in the phototherapy booths		
Accurately enters treatment dose into the UVA machine Has knowledge of Methoxsalen, what patients it is prescribed for, the different methods of administering, the time between taking medication and treatment, and has verified that the correct time has lapsed for the patient		
Accurately assesses the patient's skin and skin type at each visit per the protocol listed in the manual		
Makes sure the patient wears eye protection during treatment. Provides goggles if needed to patient.		
Follows protocol regarding patient's response from previous treatment. Assess for redness, itching, and pain after previous treatment		
Follows dosage protocol for phototherapy in relation to missed treatments		
Follows dosage protocol for phototherapy specific to certain diagnoses		
Assures patient compliance during treatments (goggles, head covered, genitals covered)		
Observes two PUVA phototherapy treatments by a RN		
Provides three supervised PUVA treatments for a patient		
Accurately documents assessment and treatment provided to the patient		
Provides the patient with aftercare instructions		
Instructs the patient to return to the front desk to schedule a follow-up appointment with provider as indicated (3 or 6 month interval)

Primary Care: Clinics in Office Practice, 49(1), 1-22. https://doi.org/10.1016/j.pop.2021.10.001 Liersch J, von Köckritz A, Schaller J. Dermatopathology 101: Part 1 - Inflammatory skin diseases. J Dtsch Dermatol Ges. 2017 Jan;15(1):9-30. doi: 10.1111/ddg.13176. PMID: 28140531. Ludmann, P. (2022). What is a skin biopsy? American Academy of Dermatology Association. Accessed via https://www.aad.org/public/diseases/a-z/what-is-skin-biopsy. 		
	Date	Verifier Initials
Retrieve Dermatopathology order in EPIC, including details in the comment section such as site of biopsy, type of biopsy (shave vs. punch)		
Ensure there is a new sterile skin marking pen for the provider to mark the site.		
Ensure there is a written or electronic consent.		
Clinical staff prints labels from Dermatopathology order, take patient labels to room, enter room, conform patient name, DOB, and biopsy site(s).		
Clinical staff will obtain 2 photos withing EPIC via Haiku or Canto app. Take one close-up photo and one distant photo of marked biopsy site demonstrating anatomical position with corresponding letters and landmarks. Clinical staff will label photos in Media via Haiku app to match biopsy site per order.		
Clinical staff will set up biopsy tray specific for corresponding biopsy (shave vs punch: materials in section V of Skin Biopsy departmental policy.		
Clinical staff positions patient.		
Clinical staff will collaborate with provider to cross check marked biopsy sites on Dermatopathology order form with the consent form.		
Procedural time outperformed according to Universal Protocol 4019 .		
Provider may start procedure, if procedure performed by an APP, refer to Standardized Procedure 165, Skin Punch Biopsy (Adult)		
Clinical staff shall verbally confirm the correct specimen is in each specimen bottle at the end of the procedure, including multisite biopsies correlating to properly labeled specimen cups (i.e. Specimen A, B, C).		
During procedure: Drop correct suture (articulate the types of suture, Vicryl vs Vicryl rapide).		
During procedure: Maintain clean field, properly assess with hyfrecator, properly use smoke evacuator.		
Clinical staff shall apply standard dressing of Petroleum Jelly with adhesive bandage (Band-Aid) to cover site.		
Ensure post procedure care instructions are included in AVS and verbally provide post care instructions to patient.		
Clinical staff ensures proper labeling, handling, and delivery of specimen to the dermatopathology lab (including biopsy book and specimen log).		
Observe 3 Shave Biopsies		
Observe 3 Punch Biopsies		
Independently set up 3 trays for shave biopsies and provide post procedure care under the observation of verified staff.		
Independently set up 3 trays for punch biopsies and provide post procedure care under the observation of verified staff.		
Clinical staff must be completely signed off by verified staff prior to independently assisting the provider.
