

## MMI 291 Seminar Series

Current Theme: Interdisciplinary Research  
Winter Quarter 2025 – CRN 30957

Join us for Medical Microbiology and Immunology  
Department research presentations

Friday Seminar at 12:10-1 p.m.

Genome and Biomedical Sciences Facility, Room 1005

**Lauren Radlinski**  
**Post-doctoral Researcher**  
Andreas Bäumlner Research Lab

**Research Presentation Title:** Metabolic reprogramming of the host epithelium drives pathogen outgrowth during vaginal dysbiosis

**Research Interests:** Host-microbe interactions in the gut and vaginal tract

**Leticia Lazaro-Anton**  
**Post-doctoral Researcher**  
Renée Tsohis Research Lab

**Research Presentation Title:** 'Sphingosine-1- Phosphate links ER Stress to Nod1/2-mediated Inflammation In response to *Brucella abortus* infection'

**Research Interests:** Integration of innate immune signaling and cellular stress responses in regulating inflammation during bacterial infection

Feb.  
7

February 7, 2025  
12:10 – 1 p.m.  
GBSF  
Hybrid Meeting

Medical Microbiology  
and Immunology  
School of Medicine
