

GU/Renal Pathology Fellowship Goals and Objectives

To grow in confidence and efficiency in all aspects of the sign-out of a tertiary care assortment of urological and medical renal specimens

To comprehend and apply standard guidelines for diagnosis, reporting, and ancillary tests for urological and renal specimens as articulated by subspecialty societies and publications.

To progress toward supervised independent sign-out of such specimens

To assist in teaching by delivering educational content and serving as a resource for residents

To be involved in translational or basic research project(s) leading to paper and abstract authorship.
