

Electrophysiology Services Core – Rates

The Wulff laboratory within the Department of Pharmacology can perform patch-clamp electrophysiology services for lymphocyte ion channels to both University and non-University clients on a recharge basis. We offer manual whole-cell and current-clamp electrophysiology services for lymphocyte ion channels (Kv1.3, KCa3.1, Orail, P2X4), on recombinantly expressed or native channels in human and rodent lymphocytes.

Base Recharge Rate - \$2838.09
External Customer Rate - \$3,794.52

For each twenty-hour unit of work.
